

Fraud & Risk Reduction

Mobile phone account takeovers nearly doubled from 380,000 to 680,000 in a single year¹

Our Solution

Phēnix X1

offers the traditional functionality of the Android™ operating system (OS), including a dual O/S and dual SIM slot for personal and private information, plus a suite of secure tools and features within a blockchain ecosystem

Consumer Habits

91%

of consumers use a smart phone²

88%

of smartphone users do their banking online²

Our Mission

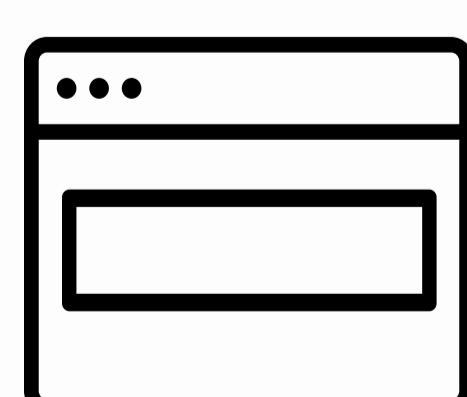

User authentication should be as simple as it is secure. Our mission is to help consumers and organizations be safe in their digital transactions and to help business leaders dramatically improve the way they interact with their critical information and their customers.

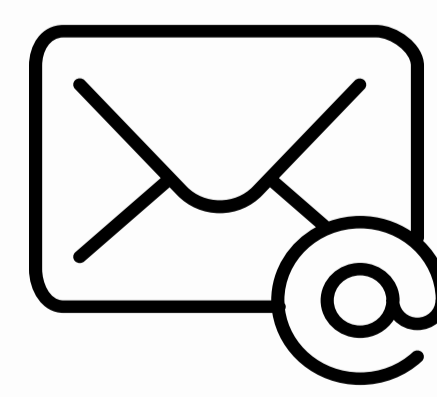

Phēnix X1 is the first high-end, voice and facial authenticated, Blockchain protected, secure mobile phone that also comes with pre-installed apps, a personal and private area that saves money, giving users a safe environment and privacy when they need it
